Participate in an optional volunteer biodiversity survey to collect baseline data on species in the seagrass meadows, under rocks, and in reef crevices.

KAYAK

Kayaks provide a perfect, non-intrusive way to get close to turtles and rays and other marine life around the flats, offering a new perspective of the island. Kayaks are available for guests to use at their own pace. A picnic basket can be arranged for a secluded meal at a chosen spot.

ALPHONSE CYCLE TOUR

Join a guided tour of Alphonse, stopping at major landscapes and seascapes to explore forest trails and hidden spots. Learn about the island's early settlers and the transformation from indigenous forest to coconut plantation. Our knowledgeable guides will share insights about birdlife, fish, and plants as you discover every corner of the island.

ICS WALK

Established in 2007, the Island Conservation Society (ICS) Centre has been crucial in maintaining and caring for Alphonse's ecosystem. The ICS team offers activities like Turtle Patrol, Giant Tortoise viewing and feeding, and bird-watching. These efforts are cherished by everyone on Alphonse, and without the team's expertise, the atoll's ecosystem wouldn't be as it is today.
