

NEWS FROM THE GROUND

EXCITING UPGRADES COMING TO CHEM CHEM

We're constantly working to improve our guest experience at Chem Chem. With this in mind, we have some exciting updates coming to our lodge and camps over the next few months.

New pool at Little Chem Chem

There's nothing quite like an afternoon spent relaxing poolside on a hot day or a refreshing post-game drive dip, which is why we're thrilled to be building a pool at Little Chem Chem. This exciting new facility will be ready to welcome swimmers come June.

Boosting our wellness experience

We're welcoming an osteopath to the Chem Chem family for the month of August. Her expertise lies in using specialised joint manipulation and gentle stretching techniques to restore balance in the body, especially within the musculoskeletal system. She will be available to give treatments, and will also be training our spa team in the art of osteopathy.

Fitted air conditioners in Chem Chem Lodge's tented suites

Our guests will now be able to cool off in the comfort of their rooms as each of Chem Chem Lodge's tented suites is being fitted with an air conditioner unit.

Portable air conditioning units in Little and Forest Chem Chem

Sun-weary guests can now enjoy some respite from the heat when relaxing in their tents as portable air conditioning units are now available in our tented rooms at both Forest Chem Chem and Little Chem Chem.

In-room fridges and coffee machines are coming

Putting ice-cold drinks and freshly brewed coffee at their fingertips, we're elevating our guests' in-room experience by equipping each tent (across all 3 of our properties) with a fridge and coffee machine.
